PROFILE

Passionate frontend developer at Invicta Innovation with a focus on creating software that improves people's lives. Skilled in JavaScript for web interfaces and React Native for mobile apps, I consistently strive for excellence and innovation. BEng. (Hons) in Software Engineering from Esoft Metro Campus provides a strong foundation for career growth. Inspired by reading, exploring new technologies, and volunteering, I continually challenge myself. Eager to refine skills, collaborate with others, and make a meaningful impact in software engineering. Expertise in SQL query design and analysis, along with results reporting for clients and stakeholders, demonstrates meticulousness and a proactive mindset. Quick learning nature fueled by passion for designing and developing innovative web applications.

WORK EXPERIENCE

Software Engineer

Invicta Innovation Jaffna   Apr2023 - Present

- I have a proven track record of developing and implementing software solutions for diverse projects, demonstrating expertise in programming languages and algorithms.
- Through collaborative efforts with team members, I successfully troubleshoot and debug software issues, enhancing product functionality.
- Additionally, I contribute to the design and documentation of software systems, prioritizing scalability and maintainability to ensure long-term effectiveness.
- Drafted risk assessment documentation for new projects and ongoing software development efforts.
- Optimized software development processes through continuous evaluation of tools, methodologies, and best practices.
